GOODLUCK 電燈箱 ZTK8-I

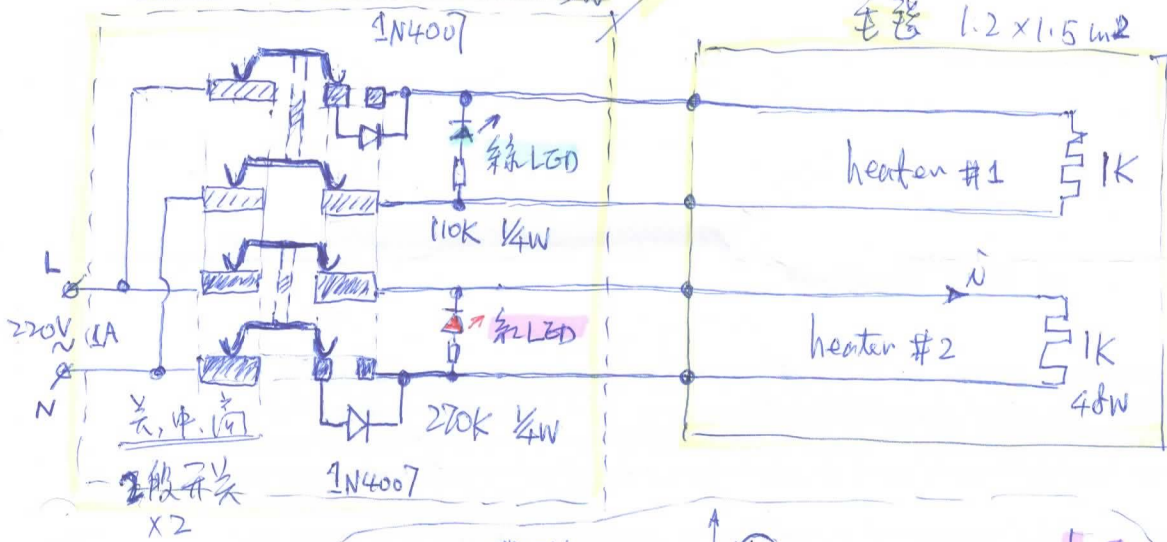

$250V \sim 1A \quad 50Hz$	$\approx 100W$
---------------------------	----------------

110 V

 $\approx 25W$

原由證據充分

子器 $1.2 \times 1.5 \text{ m}^2$

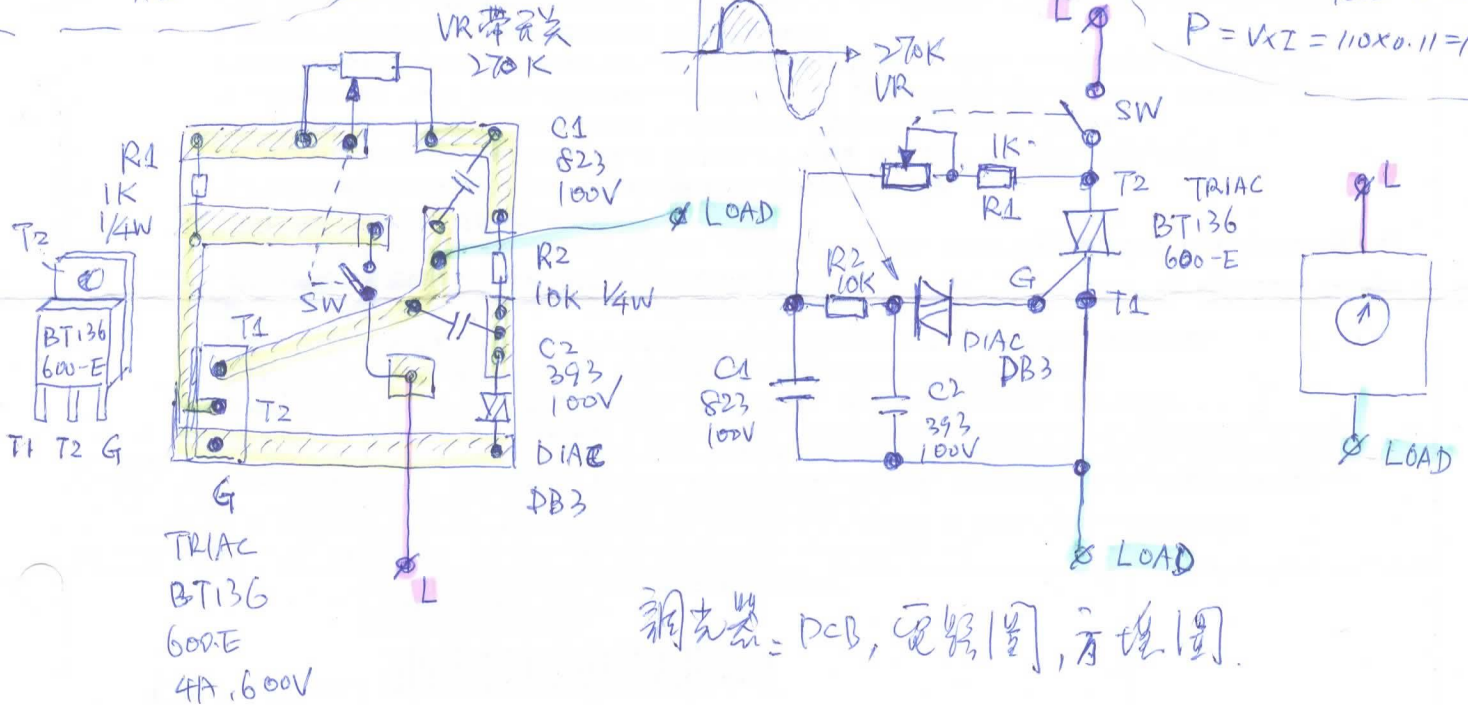

$$I = V/R = \frac{220V}{1000} = 0.22A$$

$$P = V \times I = 220 \times 0.22 = 48W$$

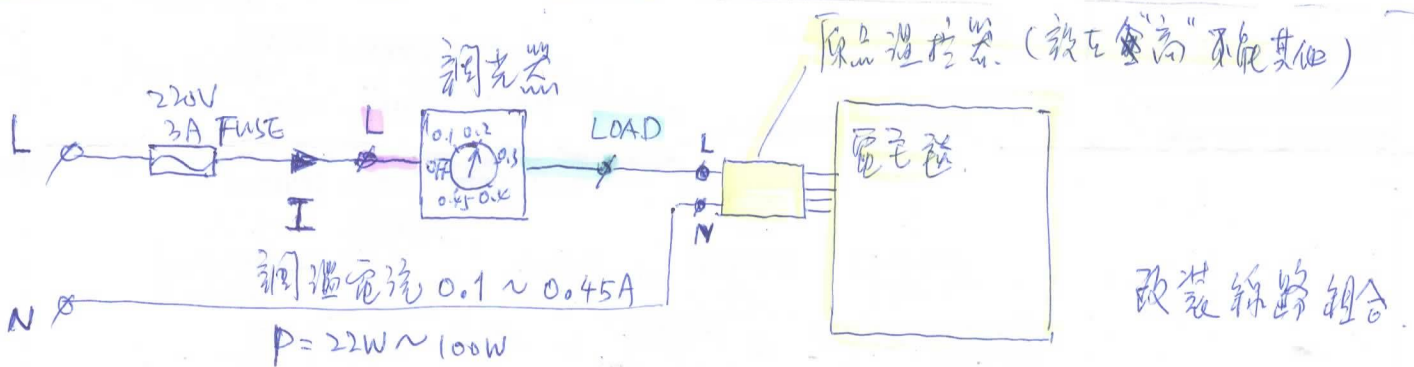

dan $V = 110V$

$$\bar{i} = V/R = \frac{110}{1000} = 0.11 \text{ A}$$

$$P = V \times I = 110 \times 0.11 = 12.1 \text{ W}$$

調光器 = DCB, 電路圖, 方塊圖.

改裝線路組合
